Table of contents

Key data

A comprehensive collection of industry wide data and information, including history, policy and key industry developments in 2010; vehicle sales data; vehicle parc data; price indexes, earnings and vehicle finance; industry production and trade plus information sources.

Australian car manufacturers

This chapter provides comprehensive profiles of the Australian car makers with each profile featuring the history of the Australian company and its links to the parent organisation, market strategies, manufacturing operations and production, exports and international activity, market performance and models and financial performance, with data on revenue and profits for more than two decades.

Light vehicle importers

Importers of more than 20 light vehicle marques are covered in this chapter. The detailed profile for each light vehicle importer includes company composition and ownership, a brief history of Australian operations and the marques distributed, market performance and what has affected this, sales by model within the various vehicle segments and financial performance.

Heavy commercial vehicle assemblers & importers

There are five heavy truck marques assembled in Australia today - Cat, Iveco, Kenworth, Mack and Volvo - and five key importer groups - Isuzu, Hino, Scania, Daimler Australia/Pacific and Western Star. This chapter provides a detailed profile for each of these companies and the marques they distribute.

Australian component manufacturers

In this chapter there are profiles of more than 90 Australian component manufacturers. The information and data in each profile includes a brief history of the manufacturer, recent developments, company ownership and links to international affiliates, operations including divisions and subsidiary companies, major automotive products and key customers, international and export activity and financial performance.
